

Amendments To The Specification

The specification was objected to because it was replete with grammatical errors.

In light of the number of revisions to the specification that were needed, the Applicant has submitted a substitute specification herewith.

As required by 37 C.F.R. 1.125, a marked up copy of the specification as it was filed is attached, showing revisions that were made to the specification to correct grammatical and other errors. A second, clean copy of the specification is also attached.

The undersigned diligently attempted to locate all of the grammatical and idiomatic errors in the as-filed specification. An equal effort was made to accurately correct all such errors on the attached marked up and clean copies.

No new matter is believed to have been added by the implementation of such corrections.
